

## CORONA VIRUS (COVID- 19) UPDATE

We have been continually monitoring the unfolding of the COVID – 19 situation very closely from both government and other sources. These include the Department of Health, World Health Organisation and the Centre for Disease Control & Prevention. The safety of our patients is our only priority.

In addition to our already very high Infection Control standards; we have taken multiple very strict precautions to minimise the risk of exposure to all patients and visitors.

- These include sanitising prior to entering the premises, with sanitiser available at the front access point.
- Hand sanitiser is also available inside the premises.
- All high usage surfaces including door knobs, eftpos machines, chairs and reception desk is sanitised with hospital grade disinfectant between every patient.
- Bathrooms are sanitised after every use.
- Our staff are advised not to present for work if feeling unwell and patients that are feeling unwell are advised to rebook their appointments twenty one days from their current appointment provided they feel fully recovered.

Please feel free to discuss any concerns with our staff members or dentists.

We will continue to monitor the situation and increase any infection control procedures as required.
